Before & After Case Study

RESIDENCE 9 WINDOWS | GRAINED WHITE ● GRAINED WHITE

My RESIDENCE

Before & After

BEFORE

Traditional timber windows require a lot of upkeep - with education being a top priority, this is something the college doesn't have time for.

AFTER

Specified for its authentic timber aesthetic, R9 in our classic colour choice Grained White was the perfect fit for this Grade II listed building.

Scarborough College

This beautiful 14-acre site in the seaside town of Scarborough has been committed to the highest standards of education for over 100 years for children aged 3 - 18.

Specified for its authentic timber aesthetic, R9 in our classic colour choice Grained White was the perfect fit for this Grade II listed building.

As well as the perfectly replicated aesthetic features that make Residence 9 the ultimate timber alternative system, it achieves one of the highest classifications of British Standard weather tests due to its robust design and market leading thermal and acoustic values, far surpassing the British Building Regulation requirements. The result is a heritage building restored to the highest standards, not only sympathetic to its rich history, but with unbeatable performance too.

Why R9?

The flush sash exterior is timeless and a true recreation of traditional 19th Century timber windows. This is achieved by mirroring the sizes historically documented and as listed in Article 4 directions. Furthermore, all the glass sight-lines are perfectly equal providing symmetry and style. The internal shape and depth is completely authentic and gives an elegant and distinctively deep appearance.
